

Fardux

Fardux IDEA Operator

Advanced Training Course

Fardux will be conducting several training courses in 2015, as outlined below. The advanced IDEA operator courses are aimed at students that have already attended basic Fardux Data Acquisition training. Students will receive hands on software training and hardware familiarisation. Each student is issued a comprehensive electronic training manual at the successful completion of the course.

OBJECTIVES AND TOPICS

This course aims to train students in advanced operation of the IDEA software and associated hardware to cover the following major categories:

- **System Overview Refresher**
- **IDEA Lite**
- **Client Stations**
- **Enhancements**
 - Setup
 - Vortex Meters
 - External Meters
 - Complex Macros
 - Multiplot and Indicators
 - Reports and Cummulatives
 - Calibration Wizard
 - Vista/Windows 7/Windows 8
 - Depth Plotting
- **DataCast**
- **WITS Import and Export**
- **ASCII Transfers**
- **SeaLink**
- **OLSB**
- **MLI**
- **SandSnoop**
- **Gas Sensors**
- **Extender Boxes**
- **Real Time Printing**
- **Modbus, Master and Slave**
- **Networking**
 - Simple Networks
 - Wireless Networks

WHO SHOULD ATTEND?

Service Supervisors, Sr. Service Supervisors, Service Coordinators, Team Coordinators, Service Managers, Senior Field Operators.

PREREQUISITES

Fardux IDEA Enterprise Basic Course. Students should have Surface Well Testing experience of at least one year, as well as experience and familiarity of Microsoft Windows and Excel Spread Sheets. Candidates with Down hole Memory Gauge or S.R.O. experience are often suitably pre qualified. A good standard of spoken English is also required.

Students are responsible for their own accommodation, transport and meals. Fardux will supply a light lunch and coffee and tea during course times.

IDEA Operator Advanced

Course Dates 2015

UK OFFICE

13th - 17th April
5th - 9th October
