LAB CABINS

Fardux A WellWise Group Company
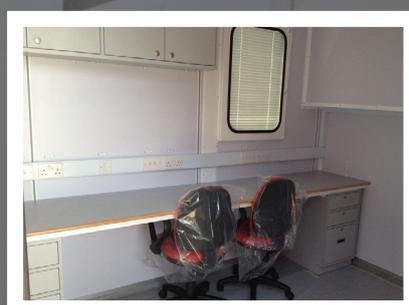

The Fardux labs for onshore and offshore applications are designed to the highest specifications.

Labs range from zone 2 to full A60 zone 1 environmental protection. All units meet or exceed industry standards including EN12079, DNV 2.7-1, DNV 2.7-2 and ATEX in addition to being compliant with SOLAS/IMO for A60 fire protection. All lab units are also CE marked with CSC frames.

The lab interiors are designed for optimal working conditions, counter and storage space is plentiful and work areas are provided with electrical outlets and network connection ports. The Fardux data logger and display monitors can be placed for optimum ergonomic visualization.

The standard 20' labs can also be divided to provide a workshop area with or without separate access points. Units are highly flexible and robust for use throughout the world.

Custom designs can be accommodated providing our clients with full flexibility on workspace layout

All the data, when and where you want it
