

Fardux

Fardux IDEA Operator

Basic Training Course

Fardux will be conducting several training courses in 2015, as outlined below. The basic IDEA operator courses are aimed at students that have not attended any previous Fardux Data Acquisition training. Students will receive instruction from basic principles through to final report preparation. Each student is issued a comprehensive electronic training manual at the successful completion of the course.

OBJECTIVES AND TOPICS

This course aims to train students in the full operation of the Idea software to cover the following major categories:

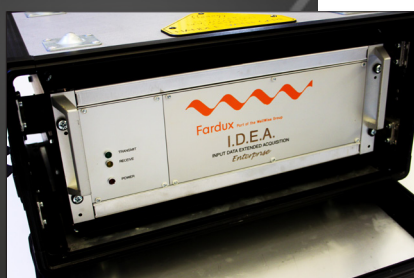

- Software Installation
- Channel Configuration and Transducer calibration
- Hi and Lo Alarms, Trending and Event Logging
- Real Time Data Acquisition - Screen Displays, Hot Spots and Hyperlinks
- Export of ASCII data to Spread Sheet reporting Packages.
- Customising Screen Images.
- Storing Data To Disk
- Real Time Printing
- Final Reports. Custom Reports, Historical Plots.
- Hardware Configuration, Cable System, Logger and Transducers

WHO SHOULD ATTEND?

Service Supervisors, Sr. Service Supervisors, Service Coordinators, Team Coordinators, Field Sales Reps, Service Managers, Field Operators SWT.

PREREQUISITES

Students should have Surface Well Testing experience of at least one year, as well as experience and familiarity of Microsoft Windows and Excel Spread Sheets. Candidates with Down hole Memory Gauge or S.R.O. experience are often suitably pre qualified. A good standard of spoken English is also required.

To find out the **current pricing** for any chosen course, please get in touch with us.

Students are responsible for their own accommodation, transport and meals. Fardux will supply a light lunch and coffee and tea during course times.

COURSE DURATION: 5 DAYS

IDEA Operator Basic

Course Dates 2015

UK OFFICE

16th - 20th February
11th - 15th May

How to Book

To apply to any of our courses, please either call the Fardux office closest to you, or complete and submit the short form on our website. Once the online form has been submitted, one of our team will contact you with costs and terms. You must choose whether to apply for one of our scheduled training courses, or request training at your location.

Fardux

WHY FARDUX?

We have always believed that the supply of our oil and gas data acquisition products and solutions is just the beginning of our relationship with our customers.

We endeavour to provide support from the moment the decision is made to purchase any product, and then throughout the product's lifecycle. We always work hard to ensure our customers are provided with the best solutions, support and advice.
